THE ERICSSON CALORIC PREMIUM ENGINE

(Medal Awarded by the New-Jersey State Fair)

Has been in operation for two years, and has proved itself well adapted for many purposes where light power is required. FOR FRINTING, PUMPING, HOISTING, DRIVING

COTTON GINS, &c.,

It is invaluable, being more economical than steam, and not possible to cause damage to life and property by explosion. There is no more risk from for than from an ordinary coal stove, and there is no extra charge for insurance, in consequence of their being put into a building or dwelling. The Government permits them in the Government stores, while steam is prohibited.

Many certificates could be given of their value, but it is hardly necessary. We ameat the following as a specimen of the many:

The machine requires but little attention, which can be rem-

A RASCALLY OUTRAGE.—Soon after the train which was due here at 7 o'clock last evening had left Norwalk, a stone about the size of a hen's egg, was thrown at it. The missile entered one of the cars through the center pane of one of the bow-windows, and hit Mr. Bergen, of the of firm Gibson & Co., New-York, behind the ear—knocking him down, and rendering him insensible for some time. Conductor Stock soon restored quiet and rendered every aid to the injured mas. The stone must have been thrown with great violence, as it left a hole in the glass just the size of itself, without fracturing the rest of the pane. We trust that the miscreants who of late have committed so many outrages of this kind will be speedily detected and brought to punishment. They should be dealt with in so severe a manner that others will be dealt with in so severe a manner that others will be deterred from indulging in the like propensity. A reward of fifty dollars has been offered by James H. Hoyt, the Superintendent. [Bridgeport Advertiser, Nov. 22.
